There is but one Ruberoid—Look for the Man on the Label.

Ruberoid---The Time-Tested Roofing

RUBEROID is the original prepared roofing. Hundreds of Ruberoid Roofs, which were laid when it was first marketed more than thirty years ago, are still giving as good service as the day they were laid.

Ruberoid Roll-roofing

Ruberoid Roll-roofing is made in two styles: Smooth-surfaced (gray) and Mineralized (surfaced with sage-green, tile-red or steel-blue slate). Sherardized nails and lap cement are furnished with each roll.

Ruberoid Smooth-surfaced Roll-roofing is furnished in three weights: medium, heavy and extra, 45, 55 and 65 lbs. per 108 sq. ft. Ruberoid Mineralized Roll-roofing (Extra heavy) weighs 105 to 110 lbs. and (Heavy) 85 to 90 lbs. per 108 sq. ft.

Ruberoid Giant-shingles

Ruberoid Giant-shingles combine unusual durability with unique features of economy. They measure 10 ins. by 14 ins., have a ½ in. cutout and are intended to be laid 5 ins. to the weather. They are self-spacing and self-aligning. These features reduce the cost of application 50%. They are surfaced with natural crushed slate in sage-green, tile-red and steel-blue.

Ruberoid Strip-shingles

Ruberoid Octab Strip-shingles are especially adapted for laying over old wood shingles. They are made in sage-green, tile-red and steel-blue. By varying the methods of laying, any one of many attractive designs may be obtained. Size: 11 by 33⅓ ins. Weight: 185 to 195 lbs. per square.

Ruberoid Square-tab Strip-shingles are made to lay 4 ins. to the weather. They are manufactured in two sizes, according to the underlap desired: 10 by 32⅛ ins. (weighing 185 to 195 lbs. per square) and 12½ by 32⅛ ins. (weighing 235 to 245 lbs. per square). Their surface is the same as that of the Octabs.

Ruberoid Built-up Roofing

A Ruberoid Built-up Roof consists of one layer of Ruberoid Asphalt Felt and two layers of Ruberoid Cap-sheet bonded together with Ruberoid Solid-cement. Every part is made of time-tested materials. Ruberoid Cap-sheet in itself is a mechanically perfect weather resistant. Ruberoid Solid-cement is 98.5% pure. The heavy weather coating of Ruberoid Cap-sheet makes it unnecessary to apply a special surfacing.

For Bungalow or Mansion

An Edwards Metal Spanish Tile Roof

Costs No More Than a Good Tin Roof

Its scores of vital, practical advantages cost no more than common roofing, yet mean tremendous economy—it needs no repairs and outlasts several ordinary roofs because of its practically indestructible metal construction.

It is absolutely wind, weather, storm, fire and lightning proof.

Easy to apply. No soldering, no special tools—any ordinary mechanic can apply it. Interlocking system by which tiles dovetail into each other makes the roof absolutely water tight and provides for expansion and contraction perfectly—summer and winter. It is guaranteed non-breakable.

HOME-BUILDERS—Simply send us today the dimensions of your building and we will tell you by return mail exact cost of all material.

Here is the principle of the Dings. The pulley catches the iron and throws it aside letting the material pass on.

Dings High Intensity MAGNETIC SEPARATION

Dings Magnetic Separators—*"High Intensity!"*

EXTRACTING only part of the iron from your product isn't worth much—in short, paying for separation that only half separates means a loss.

Dings "High Intensity" Magnetic Separators because of Dings design give greater strength. Materials aren't skimped in a Dings as the weight will show. The result is pulling power that will extract all the tramp iron in your product.

Over 4,000 Dings Separators are in use in feed mills, foundries, rock crushing plants, rubber plants, glass plants, prepared food plants, etc.

—there is a type for every service

"HIGH DUTY"
Magnetic Pulleys
AND
Magnetic Separators

For Removing all "Tramp" or Scrap Iron from All Sorts of Materials. All Sizes and Capacities.

MAGNETIC MFG. CO., 279 23rd Avenue MILWAUKEE, WIS.
DESCRIPTIVE BULLETINS AND FULL INFORMATION SENT ON REQUEST

The "HIGH DUTY" Magnetic Pulley is extremely powerful, designed to handle a large overload of material, owing to its exclusive ventilated construction.

The "HIGH DUTY" will positively remove iron and steel from any material. As a protection against damage to crushing and pulverizing machinery it has no equal.

"HIGH DUTY" Magnetic Separators are used for refining brass, and other metals, concentrating ores, etc.

"QUICKWORK"

(TRADE-NAME REGISTERED THROUGHOUT THE WORLD)

ROTARY SHEARS

Patented June 3, 1913; Aug. 26, 1919; Mar. 29, 1921. Other patents pending

MADE IN VARIOUS SIZES AND STYLES

For cutting all gauges of sheet and plate up to 1 inch thick used in building Ships, Boilers, Cars, Tanks and General Plate and Sheet Metal Work. Cut square or beveled edges in straight or irregular shapes, also cut rings and discs, and cut openings without starting in from side of sheet. Leaves the metal flatter than any other Rotary or Short Straight-Bladed Shear. Cuts a clean edge that requires no finishing.

Joggling and flanging rolls can be used interchangeably with the cutters.

Do Long Straight Cutting Faster Than Any Other Shear of Any Kind

One "QUICKWORK" does the work of a number of old style machines. Does it better and from two to ten times quicker.

Eliminate Oxy-Acetylene Cutting and Plate Planing

WRITE FOR CATALOG No. 60.

Van Dorn Steel Shelving

We believe the Van Dorn line of steel shelving is absolutely the most flexible ever designed. By bolting together standard units, with no tools but a screwdriver and wrench, you can erect open shelves, cupboards, lockers, racks, anything you need. Easily built around windows and doors. Altered, added to, moved, reinforced, disassembled, reassembled at any time and as required. A growing business requires that its storage space be *flexible*. May we send catalog?

Mallory's Standard Shutter Worker

Opens and closes shutters from the inside and automatically locks them in any position.

Installed in old or new buildings—frame, brick, stone or stucco. Will also operate casement windows which open outward.

Principal working parts of malleable iron, accurately machine cut; working parts tightly encased, protected from moisture and dust. Made in all sizes to fit all thicknesses of walls.

Illustration is cross section showing handle on inside of room and rod passing through wall.

KINNEAR ROLLING DOORS of interlocking copper bearing steel slats, thoroughly galvanized, are the result of more than a quarter of a century of experience as exclusive door manufacturers. They are as good as engineering skill can make them.

KINNEAR DOORS are operated by one of the following methods: Manually (push up) endless chain and gear, crank or electrically. Electrically operated doors will raise or lower at the rate of one foot per second.

They are fire resisting, and are made to close automatically in case of fire, and bear the label of the National Board of Fire Underwriters.

Let our door experts assist in solving your door problems.

PICTORIAL STEEL BULLETINS

Enamel Painted and Baked Signs

We make all kinds of factory - made signs for advertising your products. Our signs are made at surprisingly low costs—this is the most economical and direct way to advertise what you have to sell. It is helping thousands of large manufacturers to fill their books with orders—why not you, too?

Write us today the size signs and the reading matter you might want on them—send your trademarks, pictures, and indicate the quantities you might be interested in. We will tell you the cost of the signs and render such free service as will be helpful.

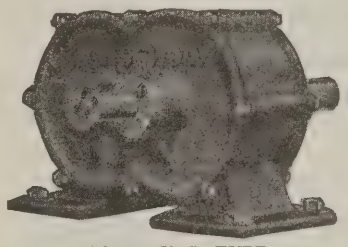
GANSCHOW SPEED TRANSFORMERS

TYPE "A"
DIRECT DRIVE
Ganschow type "A" Speed Transformers are for concentric alignment with high speed motors and find their application in any use where central alignment is possible. There are hundreds of installations on conveyors, elevators, machine tools, and special machines. Smaller in size than the motor which drives it.

TYPE "C"
VERTICAL DRIVE
Ganschow type "C" is the only vertical speed transformer unit without integral motor suspension. It does away with heavy thrust bearings to support the weight of the motor armature and permits the removal of motor to such a distance that it will not be harmed by fumes from agitators, mixers, and other similar machinery.



TYPE "B"
ANGLE DRIVE
Type "B" Speed Transformer secures an angle drive without resorting to makeshifts. It may be used in numerous places where there is not sufficient room for a direct drive unit. It is particularly effective when inserted between line shafts and may be arranged to drive each section at different speeds.

WORM GEAR TYPE
Ganschow Worm Gear Speed Reducers represent the best construction that can be had in worm gear reductions. They are carefully designed and every attention is given to each manufacturing operation. Can be furnished in sizes from ¼ to 20 H.P. and in ratios as large as 80 to 1.

WE are manufacturers of cut gears of every description in any kind of material. Our facilities are ample and our organization is thoroughly capable of producing the best in that field of manufacturing in which the William Ganschow Company is so well known. We invite your inspection of our facilities at any time, for we know that a visit to our plant will convince you that we are equipped to handle in a workmanlike way any and all of your requirements.

COMPOUND TYPE
The compound type of speed transformer is a simple spur gear reduction arranged for concentric alignment with motor and is recommended for use on small reduction ratios, particularly for slow heavy drives. Can be furnished with either spur, helical, or herring-bone gears.

JAMES MFG. CO. D. O. (The James Speed Reducing Transmissions are planetary, spur gear units operating within an internal ring gear reducing the speed of the driving motor in any ratio from 4-1 to 1600-1. They are fully enclosed and self lubricating and once installed require no attention or adjustment except occasional filling of the oil reservoir. They are made in any capacity from a fractional horse power to 200 horse power, and in most cases are smaller in size than the driving motor. They have wide application to elevating and conveying machinery, machine tools, and special machinery. We shall be glad to give any assistance possible in recommendations and specification), 1114-1120 W Monroe, Chicago

SAP SPOUTS
POST & STELLE'S EUREKA
Galvanized Iron; good for a life time. Patent air trap stays full, and seals the bore. No souring, drying up or reboring. The flanges of the Ribbed Shank allow freer flow of sap. Open channel of spout thaws out quickly. Their use means greater quantity and better quality of sap, as they draw from the outside of the tree.

MORSE
SILENT CHAIN DRIVES

Used in all industries for transmitting power from ¼ to 5000 H.P. Chain speeds up to 1200 to 1600 ft. per min., sprocket speeds from 250 to 6000 R.P.M. Sprocket centers any reasonable distance, —usually from 12 to 120 in. Advantages are positive speed ratio, 98.6% to 99% constant efficiency, quiet operation at all speeds, any convenient distance between sprocket centers, little lubrication at infrequent intervals, unaffected by heat, cold, or moisture, long life, low up-keep cost.

Shingles stained with Cabot's Shingle Stains; Stucco with Cabot's Waterproof Stucco Stains; Insulated with Cabot's Quilt. Aymar Embury II, Architect, New York.

CABOT'S
Creosote Stains

The Standard Exterior Stains for Shingles, Siding or Trimmings

The first shingle stains ever made, and the quality guaranteed by forty years' use all over the world. Made of the strongest and finest pigments, ground in pure linseed oil, and Creosote, "the best wood preservative known." No cheapeners, no adulterants, no kerosene or benzine.

CABOT'S "QUILT"

Cold-Proof, Heat-Proof, Sound-Proof

The warmest insulator. One layer equal to 28 to 40 layers of common building paper. Saves its cost many times over in reduced fuel bills. The most perfect sound-deadener, because it breaks up and absorbs the sound-waves. Scientific, sanitary and uninflammable.

Cabot's Waterproof Stucco and Brick Stains. For waterproofing and artistically tinting stucco and similar cement surfaces, and for freshening and restoring old, faded and discolored bricks.

Cabot's Conservo Wood Preservative. For preserving posts, sills, planking and all lumber that is exposed to decay.

Cabot's Old Virginia White. A soft, clean exterior white, as brilliant as whitewash and as durable as paint.

Cabot's Old Virginia Tints. Beautiful tints giving the "pastel effect."

Cabot's Double White. Two coats cover as well as three of white lead, and much whiter.

Cabot's Damp-proofing. For direct plastering on brick or concrete without studding or lathing.

Cabot's Clear Waterproofings. For brick and cement walls.

Cabot's Protective Paint. For protecting structural iron and steel from rust, corrosion and electrolysis.

Cabot's Mortar Colors. Paste colors of great strength and durability for reliable mortar staining.

Pressed Steel Oil Pan for Automobile Motor Taking the Place of an Aluminum Casting

It will pay you to get into touch with us on such stamped or pressed sheet metal articles or parts as you may require. Even if you have your own facilities you can reasonably expect that it is likely we can do your work better and cheaper because of our specialized knowledge and experience. Also, if you are using castings, drop forgings or wooden parts, there are available to you many opportunities for converting such parts into pressed metal at a saving and at a gain in utility.

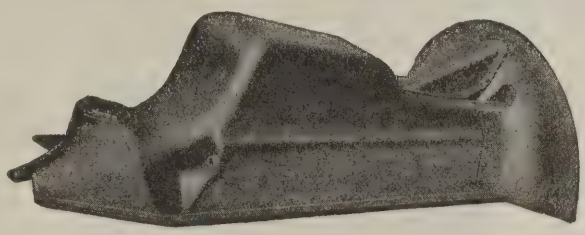
Sheet Metal



Articles and Parts Made to Order on Contract

Here's a large Pressed Steel Auto Oil Pan which took the place of an expensive machined, Aluminum casting.

Have you any aluminum, grey iron or malleable casting or wooden parts which we can probably develop into stampings or pressed metal parts?

The saving is great in many cases and the strength and utility of the pan is much increased. The stampings can be made accurately and since you can eliminate a good deal of expense of machining and fitting that is necessary with the use of castings, the advantage of using G. P. & F. precise, stamped parts is apparent.

We draw, stamp, punch, form, spin and blank the following sheet metals—Aluminum, Brass, Copper, Nickel Zinc, Monel, Sheet Steel, Tinplate, Sheet Zinc, and we have facilities for electric spot and butt welding, hot tinning, hot galvanizing, japanning and porcelain enameling.

Can you "Change to Pressed Metal?"

If so, let us work with you

There are very few cast parts that cannot be re-developed into pressed metal parts with greater strength, and save you considerable money by eliminating machining and decreasing weight.

Barnstead Mfg. Co. ("Improved Barnstead"), 62 Washington, N Boston, Mass.

Commercially pure water, under the present rigid requirements of both the laboratory and the industrial process—means water that is chemically pure:—absolutely free from gaseous, organic or inorganic impurities.

And the fact that Barnstead Stills are so widely used throughout the country is because they not only produce this industrial necessity—distilled water, free from all impurities—but produce it instantly, and at very low cost.

Equally efficient for continuous or intermittent operation. Capacities 1 to 100 gallons per hour; heated by high-pressure steam, gas, electricity or kerosene.

Write today for our Complete Handbook. It tells of many effective industrial and laboratory uses for Barnstead Water Stills.

Industrial Leaders Demand Economical Storage

CRAINE
Storage Pockets

Cement, Coal, Grain, Gravel, Sand, etc.

ASIDE from their labor saving and convenience in handling materials Craine Industrial Silos are further economical—providing greater storage capacity on less land.

Our Engineering Department is always ready to co-operate in solving storage and handling problems.

FOSTER SUPERHEATERS

For Stationary and Marine Boilers

A necessity for turbine and engine economy, for protection from boiler priming or condensation in steam supply, and for obtaining the full and lasting benefits of superheat at lowest maintenance expense. Made in several types for industrial, power, reheating and experimental purposes. Foster Economizers also improve fuel economy with negligible maintenance expense.
